# CM/ECF Event Changes For Attorney Users

The following CM/ECF changes are implemented effective April 15, 2002.

## ADDITIONS

1.      Added an *Amended Schedules (Conversion)* event to the "Other" category.

        Reason: Amended schedules filed after a conversion do not require a fee.  The current event for amended schedules without D, E, and F is unsuitable.

2.      Added a *Certificate of Service* event in the "Other" category for both bankruptcy and adversary cases.

        Reason: Use of *Document* event caused extra work to complete docket text.

3.      Added a *Modify Plan in Response* event in the "Motion" category.

        Reason: Requested by users.

4.      Added an *Avoid Lien* event in the "Motions/Applications" category with a prompt to describe the lien holder.

        Reason: Identification of lien holder in the docket is very important for court users.

5.      Added a new party type of *Intervener* with the party code of "int".  Parties added with the party code of "int" (intervener) will display in the heading of the docket report.

        Reason: Requested by users.

6.      Added a new party type of Petitioning Creditor with the party code of "ptcrd".  Parties added with the party code of "ptcrd" (petitioning creditor) will display in the heading of the docket report.

        Reason: Requested by users.

7.      Added the ability to create a proofs of claim deadline (which will automatically be calculated to be 90 days from the file date of the event) to the *Voluntary Petition Chapter 11* and *Voluntary Petition Chapter 13* events.

        Reason: Requested by users.

## MODIFICATIONS

1.      Modified the docket text of the *Reopen Case* event in the "Motions/Applications" category to remove unneeded commas.

        Reason: Docket text in event was incorrect.

2. Modified the *Abandon* event in the "Motions/Applications" category to *Compel Abandonment* and added a prompt to describe the property to be abandoned.

> Reason: The event title and text did not agree with the actual document usually filed. Users desired a description of the property to be abandoned.

3. Modified the *Objection* event in the "Objection/Response" category to allow adding text to the docket text, i.e., "Objection {text} re:...."

> Reason: Users requested more flexible text for this event.

4. Modified the name of the *Disclosure-attorney Compensation* event in the "Other" category to *Statement Re: Disclosure - Attorney Compensation*.

> Reason: When schedule "packages" were filed and users selected individual events for simultaneous docketing, the word "Schedules" did not display first in docket text.

5. Modified the name of the *Indv Db Statement of Intentions* event in the "Other" category to *Statement of Intentions Indv Db*.

> Reason: When schedule "packages" were filed and users selected individual events for simultaneous docketing, the word "Schedules" did not display first in docket text.

6. Modified the *Answer* event in the Adversary "Obj/Resp/Original Answers" category to add a message instructing the user (1) always link to the original complaint and (2) to add text if they are answering an amended complaint.

> Reason: Users had no way to make docket answers to amended complaints that would correctly terminate the answer due deadline.

7. Modified the *Involuntary Petition Chapter 11* event and the *Involuntary Petition Chapter 7* event in the "Other" category to add the message:

> All Petitioning Creditors Should Be Added as Petitioning Creditors.
> Petitioning Partners Are Added as Interested Parties.
> All Petitioners Should Be Filers of the Involuntary Petition.
> Use Your Browser Back Button to Return to the Add Party Screen to Make Corrections, If Needed."

> Reason: Instructions were needed to insure parties were added correctly.

8. Modified the *Schedules* event in the "Other" category to add "Statements and Summary" to docket text.

> Reason: Docket text was not complete when users used the *Schedules* event to docket the entire schedules package.

## Listing of Motions/Applications Category after changes
